

Notice

You have accessed an obsolete document. Version 1.1 of the BWC XL.1 Owner's Manual was replaced in August 2002 with Version 2. Version 2 covers the second generation of the PowerCenter controller. The latest version (as of August 2003) is Version 2.2.

If you are considering the purchase of a BWC XL.1 battery charging system, please return to the home page of www.bergey.com and select the XL.1 Owners Manual link in the "What's New" section. This will launch the latest version of the Owners Manual.

If you have a 24 VDC XL.1 purchased before August 2002, then you can access the proper version of the Owners Manual through the "Technical Stuff" section of www.bergey.com. This is the proper version of the manual if your PowerCenter has a circuit breaker on the left side of its enclosure.
